$$\left(e^{(i\times\pi)}+1\right)=0$$

$$\left(e^{(i\times\pi)}+1\right)=\left(\left\{\left(\frac{\pi^2}{6}\right)^{(\{\pi\times(\pi-1)\})}\right\}\times\left\{\pi^{(-1)}\right\}\right)$$

$$\left(e^{(i\times\pi)}+1\right)=9{,}135310741110945855708340596284 9$$

$$\pi^2=9{,}877551020408163265306122448979 6$$

Conclution :

" The Euler's Identity which'es proved $\pi^2=0$ was wrong, $\left(e^{(i\times\pi)}+1\right)=9{,}135310741110945855708340596284 9$, proved with $\pi^2=9{,}877551020408163265306122448979 6$."
